

SUMMARY

Since the program opened in October 2010 through December 2011, Complications of Pregnancy, Childbirth or Puerperium was the third most common reason for inpatient hospitalization. A review of enrollment and claims data indicates that 396 of the 6,564 (6%) subscribers enrolled during this period received maternity or related services. Although Complications of Pregnancy, Childbirth or Puerperium was the third most common reason for inpatient hospitalization, claims for maternity or related services accounted for only 3% of total claims paid during this period. It is unclear whether pregnancy was the reason for enrollment since only 46 of the 396 specified a pre-existing condition on their application. However, 43 of the 46 indicated pregnancy as the reason for enrollment.

COST

- From October 2010 through December 2011, claims for maternity or related services totaled \$2.4 million
- This equates to approximately 3% of total claims paid during this time period
- Average claims per subscriber is \$5,999
- Subscribers who received maternity or related services paid an average of \$1,325 in premiums during this time.
- Claims related to Pregnancy, Childbirth, and Puerperium represent the majority (85%) of the claims followed by Liveborn Infants According to Type of Birth (9%)

**Distribution of Maternity or Related Services
Paid Claims by Diagnosis Category**

ENROLLMENT
